

Precision Parts that Guarantee Top Performance

Building Market Value Through Technological Excellence, Efficiency and Highly Skilled Personnel

Redefining Quality

AMIAD Metal Technologies Ltd. (AMT) is a manufacturer of highly accurate precision parts providing global customers in a range of technological industries **end-to-end** solutions in diverse types of materials.

How OEMs benefit from AMT services

AMT have created an uncompromising design to production service platform that supports its high standards.

- ▶ **From prototype to full production scale** - AMT engineering department provides professional manufacturing solutions tailored to the customers' strategic and operational requirements as well as quality and cost considerations.
- ▶ **High precision, advanced CNC technologies** – combined with computerized floor support and skilled engineering enable diverse manufacturing capabilities.
- ▶ **Manufacturing flexibility** – from design to production AMT adjusts its solutions to customer specifications and cost evaluation for prototypes or high, medium or low scale production volumes.
- ▶ **Uncompromising quality** – As an AS-9100 certified company, AMT implements unique quality standards testing 100% of raw materials, work in progress, sub-assemblies and finished products.
- ▶ **Investing in human resources** – expert and dedicated personnel in engineering, production and quality departments is the key resource and contribution to high performance and manufacturing excellence.
- ▶ **Optimal cost considerations** – AMT's business strategy is to tailor optimal engineering solutions and cost without compromising materials, technology and quality.

Technological Excellence

Keeping a step ahead of competition AMT's state-of-the-art facility introduces cutting-edge technological and precision equipment offering diverse manufacturing capabilities and unrivalled precision:

- ▶ CNC working centers with 3, 4 and 5 axis combined with computerized floor
- ▶ Multitask CNC machining center
- ▶ High precision equipment ensures the flawless standard of quality:
 - X, Y, Z measuring machines
 - Profile Comparator
 - Optical Multi-Sensor Measuring Center

AMT offers customers the full range of turnkey services: machining, milling, turning, thermal treatment, hardening, galvanization, painting, coating, silk and laser engraving.

Tailored Engineering Solutions

AMT engineering department provides professional manufacturing solutions for complex structures and components tailored to the customers' strategic and operational requirements as well as quality and cost considerations. Skilled and experienced engineers create the production file and support the manufacturing process including cost evaluation for high, medium and low production volumes. The entire planning and design procedures is supported by an ERP system and inspected for quality assurance at every stage.

Redefining Quality

As an AS-9100 ISO 9001:2008 certified for aviation and space industries, AMT applies these strict quality management procedures to the entire supply-chain ensuring maximum compliance to standard requirements. By implementing 100% quality assurance procedures at every stage of the manufacturing process AMT increases its customers' competitive-edge and positions itself as premium supplier to global industries.

Long-Term Strategic Partnerships

Built on reliability, efficiency and expertise AMT promotes long-term, mutually beneficial partnerships that strategically align with its customers' production and growth goals. Providing first-rate services by highly-skilled and dedicated professionals with quality, quantity and cost considerations contributes to building a network of sound long-term business partnerships that meet the challenges of modern technological markets.

AMT is a private, family-run company which launched its activities in 2005. The sound management and personal attention, hand-in-hand with a broad professional and business perspective, innovativeness, and strict adherence to quality assurance position AMT as a top-tier manufacturer of metal precision parts who delivers quality on time.

As an AS-9100 certified supplier to aviation and aerospace industries, AMT has redefined quality not merely as a motto but as a comprehensive business approach which has built its impressive portfolio of leading international manufacturers in aviation, defense , electronics , communication and other industries.

From the conceptual design, prototype and final product, AMT Technologies offers cutting-edge capabilities in a market where quality, accuracy, efficiency and cost create market value and competitive advantages.
